

CLAMP

The EGA Master non-sparking clamp is used to safely hold parts in potentially explosive environments such as refineries or ATEX zones.

1. It is made of non-ferrous alloys (beryllium copper or aluminum bronze) to avoid sparks, is corrosion resistant, non-magnetic and highly durable.

2. With a hardness of 311-408 Brinell (Cu-Be) and 241-311 Brinell (Al-Bron).

3. Its design guarantees a firm hold, complying with international industrial safety regulations.

COD.	MAT.	COD.	MAT.	L (mm)	X	Y	
72478	Cu-Be	72479	Al-Bron	210	60	36	1,2
72480		72481		250	80		1,4
72482		72483		290	100	50	1,6
72484		72485		340	150		2,0
73418		73425		400	250	150	5,0

Cu-Be Beryllium copper
Al-Bron Aluminium bronze
