MARKING TOOL

EGA Master's non-sparking marking tool is a tool used to mark, scratch or outline metal surfaces in environments with risk of explosion or fire.

It is especially useful in industries such as petrochemical, gas, naval, mining and fuel storage, where conventional steel tools could generate dangerous sparks.

1. It is made of non-ferrous alloys (beryllium copper or aluminum bronze) that prevent the generation of sparks, is corrosion resistant, non-magnetic and very durable.

2. With a hardness of 311-408 Brinell (Cu-Be) and 241-311 Brinell (Al-Bron).

3. His Design allows for fine and precise markings on metals and other materials

COD.	MAT.	COD.	MAT.	L (mm)	O.D. mm	g
74217	Cu-Be	74218	Al-Bron	400	12	500
74219		74220		600	16	1000

Cu-Be Beryllium copper
Al-Bron Aluminium bronze
