LED ILLUMINATED MAGNIFIER WITHOUT DIMMER - SKKL SERIES

Features

We replaced the light source of the SKK series with LED, and released it as SKKL. The concept of development is to pursue the equivalent performance of the conventional fluorescent light, and to adopt the fluorescent light type LED. SKKL is competitively priced and suitable alternative to the SKK Series., and the electric power consumption is reduced to about 65%. The cost of 40,000 hours of operation is reduced to 1/3, and it is an Eco-friendly product suitable for growing calls of power shortage.
